

Driven and passionate OutSystems Developer with a strong foundation in full-stack development, database design, and performance optimization. Experienced in designing and building scalable, responsive, and secure web and mobile applications. Committed to delivering clean, efficient solutions that enhance user experience and optimize business processes. Skilled in leading and mentoring junior developers, fostering a collaborative and productive team environment. Always eager to embrace new technologies and solve complex challenges to deliver high-quality, robust digital solutions.

Technical Skills

- OutSystems Reactive Web
- OutSystems Traditional Web
- Outsystems Mobile
- Outsystems AI-Mentor
- HTML
- CSS
- JavaScript
- JQuery
- Basic SQL Query
- Splunk
- Jenkins
- Python Scripting
- Flutter
- Git

Soft Skills

- Leadership
- Collaboration
- Communication
- Problem-Solving
- Adaptability
- Attention to Detail
- Time Management
- Critical Thinking

Relevant Skills

- API Integration
- Relational Database Design
- Relational Database Development
- Data Analytics
- ETL Tools
- Agile Methodology
- Performance Optimization
- CI/CD
- Unit Testing
- Security Management
- Version Control

Certifications

- Associate Reactive Developer - OS11 - Sep 2022
- Associate Developer - ODC - Jun 2023

Certifications

B.S. in Information and Technology
TSU: 2014 - 2018

Work Experience

Outsystems Developer

Collabera Digital | July 2024 - Present

As Intermediate Outsystems Developer:

- Design and develop responsive web and mobile apps using Outsystems ODC
- Code review and fix errors to improve performance
- Requirement Analysis
- Collaborate in team-based agile environment
- Ensuring the application follows best practices and standards
- KT to new Outsystems developers
- Determine coding requirements for specialized scripts.
- Security and access management
- Design and develop relational databases

Projects Handled:

- Project OSS - ODC web and mobile app to handle all of the client's data from different sources and apps by exposing and consuming APIs.
- Project SSK - ODC Mobile app that allows customer's to process transactions with minimal help of agents or a person of authority.

Achievements:

- Meet requirements with minimal usage of AO

Technical Consultant

Via - Appia PH | May 2021 - October 2024

As Technical Consultant:

- Collaborated with stakeholders and clients to transform requirements into business software solutions
- Recommend technology upgrades to improve client business solution
- Analyzed client business requirements and processes to propose optimal digital solutions
- Used strong analytical and problem-solving skills to develop effective solutions for challenging situations
- Design and develop responsive web and mobile apps using Outsystems OS10 and OS11
- Collaborate in team-based agile environment
- Ensuring the application follows best practices and standards
- Code review and fix errors to improve performance
- Determine coding requirements for specialized scripts
- Security and access management
- Design and develop relational databases
- Train new Outsystems developers

Projects Handled:

- SMDAC: FS2 - OS11 - Traditional Web App and Reactive Mobile App for consumer explore through clients website and their offers, check their card points, redeem vouchers, make payments, and manage their profile
- Testing Tool: Innovation - OS11 - Web app to generate bulk testing data within seconds using JavaScript to make more realistic dataset and test scenarios.
- Republic Cement: Supply Chain 360 Process System - OS11 - Traditional Web App for consumers to buy products and services from client.
- AFPMBAI - Loan and Insurance System - OS10 Web app for eligible to apply for products

Notable Accomplishments:

- Fastest generation of bulk random test data within a group of assessed developers.
- Generate and save millions of random data as required by client by using asynchronous processes and actions.
- Passed Associate Reactive Web Developer and Associate Developer - ODC

Jr Outsystems Developer

Direct Sourcing Solutions | May 2021 - October 2021

As Junior Developer:

- Train and familiarize myself with Outsystems
- Create new features per client request
- Code review and fix errors to improve performance
- Create relational database as requested

Projects Handled:

- Certis Group: FS2 - OS10 - Traditional Web App for customers to request services or raise tickets to client

Associate Software Developer

Accenture | December 2019 - April 2021

As Associate Software Developer:

- Train and finish Java bootcamp
- Familiarize myself with JAVA, JAVA EE, JAVA SE, JAVA ME and Spring boot
- Test code using JUnit
- Transform Java app from legacy to Java Microservices

As Splunk Admin:

- Provide support to clients
- ETL using Splunk
- Create dashboards and reports using Splunk
- Code review Splunk Devs and other admins to ensure best practices are followed
- Data analysis
- Data transformation
- Server and infrastructure support and monitoring
- Client onboarding and documentation
- Setup Indexers and configure search heads

As Splunk Developer:

- Setup forwarders
- Create Splunk apps
- Create Splunk dashboards and reports

As Jr Automation Engineer:

- CI/CD
- Fix and debug error occurring in existing scripts and Jenkins configurations
- Create new scripts using shell or python script
- Create new Jenkins jobs

As DevOps Engineer:

- Create scripts for deployment monitoring
- Configure Ansible for new features and new environments and pipelines
- Create scripts for monitoring and logging
- Monitor security logs and ensure environment security

Projects Handled:

- NAB - Data management, support, monitoring, and automation for client

Notable Accomplishments:

- Splunk User Certification - June 2020
